

# PowerMill 2023 (Simulation) cheat sheet

## Simulation tab

Note 1: To use these shortcuts, the keyboard focus has to be in the graphics window, so first click in the graphics window.

Note 2: Step sizes depends on your selection from the Simulation tab > Simulation Controls > Increment menu.

Space	Plays the simulation to the end
Ctrl + Space	Plays the simulation to the end of the current item
Right arrow	Advance one point through the simulation
Right arrow + Ctrl	Advance five points through the simulation
Right arrow + Ctrl + Shift	Advance fifty steps through the simulation
Right arrow + Shift	Advance one tenth of a point through the simulation
Left arrow	Reverse one point through the simulation
Left arrow + Ctrl	Reverse five points through the simulation
Left arrow + Ctrl + Shift	Reverse fifty steps through the simulation
Left arrow + Shift	Reverse one tenth of a point through the simulation
Shift + Page Up	Advance to the next component
Shift + Page Down	Reverse to the last component
Page Up	Advance to the next NC item or connection
Page Down	Reverse to the previous NC item or connection
End	Moves the tool to the end of the toolpath
Home	Moves the tool to the start of the toolpath
