Ctrl	(hold) Skip
Tab	Toggle skipping
Wheel up or Page Up	Rollback (reverse game back in time, even allowing menu choices to be changed)
Wheel down or Page Down	Rollforward (cancel out a previous rollback)
Middle click or H	Hide text window and other transient dialogs
F	Toggle full-screen mode
S	Take a screenshot and save it
Alt + H or Cmd + H	Minimize the window
Alt + F4 or Cmd + Q	Quit the game
Del	When a save slot is selected, delete that save slot

## Developer

These keys aims to make developer's life easier. Many of these shortcuts needs the variable "config.developer" to be set to "True" to work.

Shift + O	Console (available in developer mode or when config.console is active)
Shift + E	Editor support (The config.editor variable allows a developer to specify an editor command that is run when the launch_editor keypress)
Shift + D	Developer menu (config.developer should be set true)
Shift + R	Reloading (When

config.developer is True, this shortcut will save the current game, reload game script and reload the game. This will generally place you at the last unchanged statement encountered before Shift + R was pressed

Shift + I	Style inspecting (when config.developer is true)
-----------	--

Shift + Y	Style dumping (when config.developer is true)
-----------	---
