

BlueStacks 5 cheat sheet

General

Ctrl + Shift + H	Open the 'Game Guide' panel
------------------	-----------------------------

The shortcut above is an alternative way to open Game Guide. It normally opens when game launches.

The Game Guide can also be opened by clicking on the 'question mark' icon.

Ctrl + Shift + A	(during the game) Advanced Game Controls menu
------------------	---

The Advanced Game Controls menu lets you create new keyboard controls for any game.

Advanced Settings Controls

F1	Activate Shooting Mode
----	------------------------

In Shooting Mode, you can aim and shoot with mouse.

To customize the shooting mode, use Ctrl + Shift + A to open Advanced Game Controls, then drag and drop 'Aim, Pan end Shoot' to appropriate coordinates on the game screen.

These were the only keyboard shortcuts available in the Bluestacks, but it may not be enough if you're looking to control your games better. Take a look at this official guide to learn about the features available.
