

Corsair K100 RGB cheat sheet

Onboard lighting / function key

When iCUE is running the keyboard operates in software mode and is controlled by iCUE.

When iCUE is not running or the keyboard is connected to a device that does not support iCUE, the keyboard operates in hardware mode which uses profiles and settings saved to the onboard storage.

Keyboard lighting effects can be controlled via the below onboard shortcuts without iCUE

Fn + 1	Spiral rainbow
Fn + 2	Rain
Fn + 3	Rainbow wave
Fn + 4	Visor
Fn + 5	Type lighting (per-key)
Fn + 6	Type lighting (ripple)
Fn + 7	Color shift
Fn + 8	Color pulse
Fn + 9	Color wave
Fn + 0	Static color (cycle colors)
Fn + `	Reset to onboard stored effect
Fn + -	Decrease effect speed*
Fn + =	Increase effect speed*
Fn + [Rotate effect left*
Fn +]	Rotate effect right*

*Functions supported on select effects.

Factory reset

To clear the onboard memory, hold the Esc key while plugging in the USB keyboard connector (S then T), then release the ESC key after two seconds.

The keyboard will power on normally and be reset to factory defaults.
