Doppelklick	(to the column name in the column panel) Scroll to a column

## Search, Find and Replace

Cmd + F	Find
Cmd + G	Find next
Shift + Cmd + G	Find previous (selected) in a script
Cmd + L	Replace and find next
Cmd + E	Use selection for find

## Working with files

Cmd + N	New data table
Shift + Cmd + N	New script window
Cmd + Option + N	New journal
Cmd + O	Open file
Cmd + S	Save file
Shift + Cmd + S	Save as
Cmd + Control + Option + S	Save all
Cmd + Option + W	Close multiple windows
Cmd + Q	Exit program
Cmd + P	Print
Shift + Cmd + ?	Help
Cmd + ,	Preferences

## Window commands

Cmd + W	Close active window
Cmd + 2	Show home window
Cmd + 0	Show JMP Starter (also hides on Windows)
Cmd + 1	Show Log window (also hides on Windows)
Cmd + D	Redraw journal or report window
Cmd + +	Increase font sizes
Cmd + -	Decrease font sizes

## Editing files

Cmd + X	Cut
Cmd + V	Paste
Cmd + C	Copy
Shift + Cmd + C	Copy as text
Option + Cmd + C	Copy with column names
Option + Cmd + V	Paste with column names
Cmd + Z	Undo
Shift + Cmd + Z	Redo
Cmd + A	Select all
Cmd + J	Journal the report
Cmd + Option + I	Edit the display box properties in a report
Esc	Clear all highlights from the data table

Control + Option + Links Klick	To select multiple options, hold down the Control and Option key, click a gray disclosure icon or red triangle icon, and then select options
--------------------------------	--

## Common clicks

Read descriptions of shortcuts below to see how they work (where to click, drag, etc.).

Doppelklick	To change the number of displayed decimal places, double-click a numeric column, select Fixed Dec from the Format list, and enter the number of decimal places in the Dec field
-------------	---

Rechtsklick	To turn numeric report output into a data table, Right-click in the report and select Make into Data Table
-------------	--

Control + Links Klick	To display Row Legend in most graphics, hold down the Control key, click in the graphic and select Row Legend
-----------------------	---

Cmd + Links Klick	To select multiple category values (levels) in a Row Legend, hold down the Cmd key and click each category
-------------------	--

Cmd + Links Klick	To deselect category values (levels) in a Row Legend, hold down the Cmd key and click each category
-------------------	---

Shift	To select points in rectangular regions, click and drag the arrow tool in a plot. Extend selection by holding down the Shift key
-------	--

Cmd + Links Klick	In certain reports, apply a command to all similar reports in that window: Hold down the Cmd key, click the red triangle icon, and then select the command
-------------------	--

Option + Links Klick	Change axis specifications in most graphs, double-click or hold down the Option key and click the axis to open the Axis Specification window
----------------------	--

Cmd	To resize all similar graphs in a
-----	-----------------------------------

	report, hold down the Cmd key and resize one graph
--	--

Shift + Links Klick oder Cmd + Links Klick	To select multiple bars in a Distribution graph, hold down the Shift or Cmd key and click the bars
--	--

Cmd + Links Klick	(click the bars) Deselect multiple bars in a Distribution graph
-------------------	---

Shift + Doppelklick	To create a subset of the data table from a histogram, double-click a single bar, or hold down the Shift key and double-click for multiple bars
---------------------	---

Cmd	To select or deselect non-adjacent bars in a Pareto plot, hold down the Cmd key and click the bars
-----	--

Shift	To select a range of adjacent bars in a Pareto plot, hold down the Shift key and click the outer bars of the range
-------	--

Cmd + Links Klick Dann Doppelklick	To create a subset of the data table from a Pareto plot, for a single bar, double-click the bar. For non-adjacent bars, hold down the Cmd key, click the non-adjacent bars, and then double-click one bar. For adjacent bars, hold down the Shift key and double-click the right-most bar
------------------------------------	---

Shift	To select or deselect a range of adjacent rows or columns, hold down the Shift key and click the first and last row or column in the range
-------	--

Cmd	To select or deselect non-adjacent rows or columns, hold down the Cmd key and click each row or column
-----	--

Links Klick	To deselect rows and columns, click the top triangular region in the upper left corner of the data grid to deselect columns. Click the bottom triangular region to deselect rows
-------------	--

Rechtsklick	To repeat values or a sequence of values in a column, Hold down
-------------	---

the Control key and click on selected cells. Select Fill and the appropriate command

## Script editor

Cmd + R	Run script (submit to JSL parser)
Cmd + M	Reformat script
Cmd + [	Shift left
Cmd + ]	Shift right
Shift + Cmd + R	Submit to SAS
Cmd + B	Balance
Cmd + ]	Indent selection right
Cmd + [	Indent selection left
