

Studio Pro 10 Spickzettel

Editors

The key combinations below will work in the editors, such as the Domain Model, Pages, Workflows, Microflow, or Navigation editor.

Ctrl + C	Copy the selected element to the clipboard
Ctrl + V	Paste the contents of the clipboard in the current editor
Ctrl + X	Move the selected element to the clipboard
Ctrl + Y	Redo the last undone action in an editor pane
Ctrl + Z	Undo the last action in an editor pane
Alt + Tab oder Alt + Shift + Tab	Navigate between open editors (opens pane navigation dialog where editors are called active files)
Ctrl + Mausrad nach oben und unten bewegen oder Ctrl + Shift + Minus oder Ctrl + =	Zoom in/out
Shift + Mausrad nach oben und unten bewegen	Scrolls left or right. Works as if you were using the horizontal scroll bar
Ctrl + Shift + C	Copy the inline styles, classes, and design properties of a widget
Ctrl + Shift + V	Paste the widget styling onto another selected widget

Panes

The following key combinations work in the panes of Studio Pro.

Ctrl + F7 oder Ctrl + Shift + F7	Navigate between panes (opens pane navigation dialog where panes are called active tool windows)
----------------------------------	--

Dialog boxes

In most dialog boxes for editing properties, the following shortcut keys can be used.

Ctrl + Enter	Confirm all changes and close
--------------	-------------------------------

	the dialog box. Works as if the OK button was clicked. This is especially useful if the focus is on a multi-line text box; otherwise, pressing Enter will have the same effect
Esc	Cancel all changes and close the dialog box. Works as if the Cancel button was clicked
Ctrl + Tab oder Ctrl + Shift + Tab	Switch between tabs in a tabbed dialog box

Edit grids:

In most edit grids (such as the list of attributes in the entity properties), the following shortcut keys can be used.

Ctrl + N	Create a new item
Enter	Edits the currently selected item
Del	Deletes the currently selected item(s)
Aufwärtspfeil / Pfeil nach unten	Selects previous/next item
Ctrl + Aufwärtspfeil / Pfeil nach unten	Moves selected item(s) up/down

Domain Model Editor

The following shortcut keys are available in the domain model editor.

F2	Edits the name of the selected entity, attribute, or association
Ctrl + A	Selects all entities
Ctrl	When pressing the Ctrl, you can select additional entities components. Clicking a selected entity while holding Ctrl will deselect it
Enter	Edits the properties of the currently selected entity, attribute, or association in a dialog box
Esc	Clears selection

Page Editor

The following shortcut keys are available in the page editor.

Pfeiltasten	Moves the selection box to the widget or element in the direction of the arrow key. For example, if currently a label is selected and you press the right arrow key, the text box to the right of it becomes selected
Ctrl + Pfeiltasten	Moves the currently selected item up/down or left/right. This works on table columns and rows, tab pages, data grid and data view buttons, search fields, etc.
Enter	Edits the properties of the currently selected object in a dialog box
F2	Edits the caption of a label or button, or the contents of text, inline on the page. You can also just start typing a letter or a digit and the caption will be replaced by what you type

Debugger

Alt + F5	Step into – moves the debugger into the sub-microflow/sub-nanoflow or loop
Alt + F6	Step over – moves the debugger to the next step in the same workflow/microflow/nanoflow
Alt + F7	Step out – instructs the debugger to leave the sub-microflow/sub-nanoflow or loop
Alt + F8	Continue – instructs the debugger to continue until it reaches another breakpoint

Menu actions

The following shortcut keys are assigned to menu actions that can be used in all panes. These are also shown in the menus and listed on the documentation page for each menu under Menus.

F1	Help
F3	Highlight the next find result in

the Find Results pane and open it in an editor

Shift + F3	Highlight the previous find result in the Find Results pane and open it in an editor
F4	Synchronize the app directory
Ctrl + F4	Exit
F5	Run the app locally so you can view the app
Shift + F5	Stop the currently running app
Ctrl + F5	Deploy to licensed cloud node
F6	Deploy for Eclipse
F7	Create a deployment package
F8	Highlight the next error in the Errors pane and open it in an editor
Shift + F8	Highlight the previous error result in the Errors pane and open it in an editor
F9	Show the currently running app in the browser (responsive)
Ctrl + F9	Show the currently running app in the browser (phone simulation)
Ctrl + Shift + F9	Show the currently running app in the browser (tablet simulation)
F11	Enable and disable full-screen mode
Shift + F11	Enable and disable distraction free mode
Ctrl + F	Open search dialog box
Ctrl + Shift + F	Open advanced search dialog box
Ctrl + Alt + F	Display usages of the selected object
Ctrl + G	Go to any document or domain model element
Ctrl + L oder Ctrl + Shift + L	Cycle through the configured languages
Ctrl + N	Create a new document
Ctrl + Shift + N	Create a new app
Ctrl + Shift + O	Open an existing app or app package
Ctrl + S	Save the changes in the

currently active document tab

Ctrl + Shift + S	Save the changes in all open documents
Ctrl + W	Close the current document
Ctrl + Shift + W	Close all document tabs
Del	Delete the selected element
