Drevo Calibur cheat sheet

Pairing

Fn + Q or Fn + W or Fn + E	Pair keyboard over Bluetooth

To store other devices, turn off the Bluetooth on the first device connected, and repeat the pairing process with another key (W or E).

Backlight

Fn + Page Up or Fn + Page Down	(hold several seconds until lights start to flash rapidly) Start designing your own backlight scheme

For example to change W key's white light to a blue light, press it four times. The same process can be repeated for all keys on the keyboard.

Press Fn + Page Up / Page Down again to store your scheme

Lighting effects

Fn + Del	Full backlight mode
Fn + End	Effects auto display mode
Fn + Insert	Switch between effects (snake marquee, wave mode, ripple mode, aurora mode, reactive mode, advanced reactive mode, breathing mode)
Fn + Home	Switch lighting effects between G1 and G2
Fn + Up arrow / Down arrow	Increase / Decrease light intensity
Fn + Left arrow / Right arrow	Increase / Decrease light responding speed

Misc

Fn + [1 - 9]	F1 - F12
Fn + Win	Lock / Unlock Windows key
Fn + Space	Play / Pause lighting effects
Fn + Backspace	Light on mode

Reset the keyboard

Esc + Backspace + Left Ctrl + Right Ctrl	Hold 5 seconds to reset the keyboard
