## Formatting text (Mac)

After highlighting a text in Paper, you will see the formatting toolbar. This toolbar allows you to format text by clicking its buttons or using following keyboard shortcuts:

|                  |                        |
|------------------|------------------------|
| Cmd + B          | Bold text              |
| Cmd + Option + S | Strikethrough          |
| Cmd + E          | Highlight text in blue |
| Cmd + K          | Hyperlink              |

|                                    |                                            |
|------------------------------------|--------------------------------------------|
| # then Space                       | Insert a large header* (h1)                |
| # then # then Space                | Insert a medium header (h2)*               |
| # then # then # then Space         | Insert a small header (h3)                 |
| - then Space                       | Bulleted list                              |
| [ then ] then Space                | Create to-do                               |
| Cmd + Option + M                   | Add comment                                |
| Cmd + Shift + 7                    | Convert a bulleted list to a numbered list |
