GoldWave cheat sheet

Sound window

Left arrow	Scrolls the Sound window graph left.
Right arrow	Scrolls the Sound window graph right.
Page Up	Scrolls the Sound window graph left one screen. The amount of time scrolled depends on the current view zoom level. If you used the green playback button in view mode to play the file, playback is restarted at the new scrolled position.
Home	Moves the Sound window view to the start marker's position.
Shift + Left arrow	Moves the start marker left.
Shift + Home	Moves the start marker to the beginning of the sound.
Shift + End	Moves the start marker to the finish marker's position.
Ctrl + Shift + Left arrow	Moves the finish marker left.
Ctrl + Shift + Home	Moves the finish marker to the start marker's position.

Main Window

Alt + F6	Switches between Main window and Control window.
Space	Starts or stops playback using green play button mode. See Control Properties.
Shift + J	Makes the playback speed slower
Shift + K	Make playback speed normal
Shift + L	Make playback speed faster
F11	Displays Control Properties window.

Editing

Ctrl + T	Trims the sound. Removes all audio outside the selection.
Ctrl + Shift + J	Jumps the start marker to the previous cue point.

Ctrl + Shift + R	Selects the right channel only.
]	Moves the finish marker to the current playback position.
