

Google Translate cheat sheet

General

Ctrl + Shift + S	Swap languages
------------------	----------------

Shortcuts below aren't specific to Google Translate, but they will help you navigate between UI items.

Tab	Navigate to next UI item (button, clickable text)
-----	---------------------------------------------------

Shift + Tab	Navigate to previous UI item
-------------	------------------------------

Enter or Space	Activate selected UI item
----------------	---------------------------

Hint

For Chrome users: If you use Google Translate frequently, you can pin it to taskbar. To do this,

1. Open Google Translate web page.
2. Click Chrome's menu button on the top-right (the button with three dots).
3. Click More tools > Create shortcut...
4. Check "Open as window" checkbox and click Create.
5. Run the shortcut (if the window didn't already open).
6. Right click Google Translate icon in the taskbar and click Pin to taskbar.

Now you can access to Google Translate any time with one click from the taskbar. If you checked Open in new window in fourth step, it'll run in an separate window like standalone application.
