Cmd + Left arrow	Seek back 10 %
Right arrow	Seek forward 15 seconds
Cmd + Right arrow	Seek forward 10 %
Home	Seek to the beginning
End	Seek to the end

Selection of Multiple Tabs

These shortcuts require the tab bar to be "in focus." Currently, the only way to do this is to focus an adjacent object and "tab into" the tab bar, for instance, by hitting command + L to focus the address bar, and then Shift + Tab repeatedly until the current tab gets a dotted rectangle.

Arrow keys or Home or End	Select left, right, first or last tab. Deselect all other tabs.
Cmd + Arrow keys or Cmd + Home or Cmd + End	Move the dotted rectangle to left, right, first or last tab.

Cmd + Space	Select or deselect the tab with the dotted rectangle. The other tabs stay selected or deselected.
