Left click + Move the mouse	(drag center) Rotate around action line
Alt + Left click + Move the mouse	(drag end point (rotation around same point)) Joint bend

## Sculpting and Painting

S	Draw Size
O	Focal Shift
I	RGB Intensity
U	Z Intensity
]	Increase Draw Size by set units
[	Decrease Draw Size by set units (set increment in the Zplugin > Misc Utilities > Brush Increment slider)
T	Edit mode on/off
Q	Draw
W	Move

E	Scale
R	Rotate
Alt	(hold) Toggle ZAdd and ZSub

## Sculpting Brushes

B	Show Brush pop-up
B then S then T	Standard Brush
B then S then S	Smooth Stronger
B then M then E	Move Elastic
B then M then P	MPolish
B then C then C	ClipCurve
B then C then L	ClayLine

## InsertMultiMesh brushes

M	Show all meshes in brush
---	--------------------------

## Color

C	Select Color under cursor
V	Switch Color

## Stroke

L	Lazy mouse
1	Replay Last Stroke
3	Record Stroke
2	Replay All Recorded Strokes

## Curves

6	Smooth curve
5	Snapshot curve
Alt	(hold and draw across curve) Delete a curve

## 3D Models

Shift + Ctrl + T	Save Tool
F	Fit Mesh to view
P	Perspective
Shift + P	Floor Grid
X	Activate Symmetry
Shift + F	Show/hide Polyframe &

polygroups

Shift + Ctrl + P	Point Selection Mode
Ctrl + P	Set Pivot Point
Shift + P	Clear Pivot Point
Shift + S	Snapshot a version to canvas

## SubTools

N	List all SubTools
Alt + Left click	(on SubTool) Select that SubTool
Shift + Alt + Left click	(on selected SubTool) Frame that SubTool (Note this option can be set in the Preferences > Edit > Enable Auto Center slider; 0 = off; 1 = Alt+click; 2 = Shift+Alt+click)
Left click	(on paintbrush icon) Toggle Polypaint Colorize
Shift + Left click	(on paintbrush icon) Toggle Polypaint Colorize for all SubTools

## Geometry

Ctrl + D	Divide
Shift + D	Lower Res
D	Higher Res
Ctrl + E	(partially hidden mesh) Edge Loop

## Dynamesh

Ctrl + Left click + Move the mouse	(in Edit > Draw mode drag Background) Remesh Dynamesh sculpt
------------------------------------	--

## HD Geometry

A	(cursor over mesh) Toggle in/out of HD Sculpting mode
A	(cursor over background) Render all HD Geometry

## Masking

Ctrl + H	View Mask
----------	-----------

Ctrl + I

Invert Mask

Ctrl + A

Mask All

Ctrl

(hold Ctrl while selecting brush from popup) Select Masking Brush

Ctrl

(hold) Paint mask on object (alphas/strokes can be used)

Ctrl + Alt

(hold) Delete or paint reverse mask

Ctrl + Left click

(click background) Reverse mask

Ctrl + Left click + Move the mouse

(drag background) Clear Mask

Ctrl + Left click

(then release Ctrl, drag (starting off mesh)) Constant-intensity mask

Ctrl + Left click + Move the mouse

Alpha-intensity mask (using MaskPen or MaskRect brush) (select alpha while holding Ctrl)

Ctrl + Left click

(on mesh) Blur mask

Ctrl + Alt + Left click

(on mesh) Sharpen mask

## Topological Masking

Ctrl + Left click + Move the mouse

(drag the action line on the model) In Move, Scale or Rotate mode

## Polygroups

Ctrl + W

Group Masked and Clear Mask

## Partial Mesh Visibility & Clip Brushes

Shift + Ctrl

(hold while selecting brush from popup) Select Selection or Clip Brush

Shift + Ctrl + Left click

(then release keys &amp; drag (green selection area)) Show mesh portion

Shift + Ctrl + Left click

(then release keys &amp; drag) Hide mesh portion (press Alt (red selection area))

Ctrl + Shift + X

Grow mesh portion

Ctrl + Shift + S	Shrink mesh portion
Ctrl + Shift + A	Grow all mesh portion
Ctrl + Shift + O	Outer Ring visibility
Space	(press Spacebar without releasing mouse/pen) Move selection or clip area
Shift + Ctrl + Left click	(Click Background) Show entire mesh
Shift + Ctrl + Left click	Show only selected Polygroup (on fully visible mesh)
Shift + Ctrl + Double click	Hide selected Polygroup (on fully visible mesh)
Shift + Ctrl + Left click	Hide selected Polygroup (on partially visible mesh)
Shift + Ctrl + Left click + Move the mouse	(drag background) Reverse visibility
Shift + Ctrl + Left click	(with Lasso option selected, press this shortcut on edge that crosses loop) Hide edge loop
Alt	ClipCurve add soft direction change
Alt then Alt	ClipCurve add sharp direction change
Alt	(hold) Reverse clip area

## Stencil

Alt + H	Stencil On
Ctrl + H	Hide/Show Stencil
Space	Coin Controller

## ZSpheres

A	Preview Adaptive Skin
---	-----------------------

## Draw mode

Left click + Move the mouse	(drag Zsphere) Add a child ZSphere
Alt + Left click	(click Zsphere) Delete ZSphere
Left click + Move the mouse	(then press Shift) Add a child ZSphere at same size
Left click + Move the mouse	(drag to size new ZSphere) Add a child ZSphere and scale Link Spheres

Left click	(Click Link-Sphere) Insert ZSphere
With Tool>Adaptive Skin>Use ClassicSkinning on:	
Alt + Left click	(Click Link-Sphere) Sphere Define magnet/ break mesh

## Move mode

Left click + Move the mouse	(drag Zsphere) Move ZSphere
Left click + Move the mouse	(drag Link-Sphere) Pose (Natural-linked move)
Alt + Left click + Move the mouse	(drag Link-Sphere) Move Chain

## Scale mode

Left click + Move the mouse	(drag Zsphere) Scale Zsphere
Alt + Left click + Move the mouse	(drag Link-Sphere) Inflate/deflate chain
Left click + Move the mouse	(drag Link-Sphere) Scale chain

## Rotate mode

Left click + Move the mouse	(drag Zsphere) Spin chain
Alt + Left click + Move the mouse	(drag Link-Sphere) Control twist
Left click + Move the mouse	(drag Link-Sphere) Rotate chain

## ZSketch

Shift + A	(with a ZSphere armature in Edit mode) Activate ZSketch Edit mode
A	Preview Unified Skin

## Canvas and 2.5D

Alt	(hold) Reverse 2.5D brush effect
Shift + Ctrl + F	Crop And Fill
Shift + Ctrl + G	Grab Texture From Document

## Document Layers

Ctrl + N	Clear Layer
Ctrl + F	Fill Layer
Ctrl + B	Bake Layer
Shift + Left click	On Layer thumbnail, toggle all layers on/off
~ + Left click	(click canvas) Select layer on which clicked pixel resides

## Markers

Markers will only show when Edit is turned off

Ctrl + M	Remove Marker
----------	---------------

## Canvas Zoom

0	Actual Size
Ctrl + 0	Antialiased Half Size
(+)	Zoom In
-	Zoom Out

## Timeline

Left click	(click on the Timeline) Place a new key frame
Left click	(click on the key frame dot) Select an existing key frame
Left click	(click on selected key frame dot) Zoom Timeline in/out
Left click + Move the mouse	(drag dot to new position (dragging off end will delete)) Move selected key frame
Shift + Ctrl + Left click	(click on the key frame dot) Store new data in existing key frame
Left click + Left click	(drag dot off the Timeline) Delete a key frame
Shift + Left click	(click on the Timeline at the point where you want the copy) Copy selected key frame
Shift + Left click	(click on all the key frames dots to be copied, then Shift + click the Timeline at the point where you want the copies) Copy multiple key frames
Ctrl + Left click	(click on an existing key frame dot) Create Transition key frame
Alt + Left click	(click on an existing key frame

dot)	Create Rigid key frame
Left arrow	Go to Previous Camera key frame
Right arrow	Go to Next Camera key frame
Shift + Left click	(click on the Timeline cursor) Play the Timeline (will play as a loop)
Esc	Stop the Timeline playing
Shift + Ctrl + Left click	(click on the Timeline cursor) Record Timeline as a Movie (set the cursor to the start first using the LEFT ARROW)

## Movie

Ctrl + Shift + !	Snapshot to Movie
------------------	-------------------

## Render

Shift + R	Best Preview Render (BPR)
Shift + Ctrl + R	Render All
Ctrl + R	Cursor Selective Render

## Custom UI and Configuration

Ctrl + Alt + Left click + Move the mouse	(when Enable Customize is switched on) Move item to custom interface position
Ctrl + Alt + Left click + Move the mouse	(drag to Canvas (when Enable Customize is on)) Remove item from custom interface position
Shift + Ctrl + I	Store Configuration File
Ctrl + L	Load User Interface Configuration File
Shift + Ctrl + Alt + I	Save User Interface Configuration File

## ZScripts

Shift + Ctrl + L	Load ZScript
Ctrl + U	Reload ZScript
H	Show/Hide ZScript window
