Option + Globe + Right arrow	Move to right slide over

Assigning Globe key to another key

If you use a third party keyboard that doesn't have a globe key, you can assign this function to another key in iPadOS.

Go to Settings app and choose General. Then go to Keyboard > Hardware Keyboard > Modifier keys.

Here you can choose the key you want to change. To change Caps Lock key to Globe key, choose Caps Lock key and finally choose Globe key.
