

Atom (Windows) cheat sheet

Frequently used shortcuts

| | |
|------------------------------------|--|
| Ctrl + , | Open the Preferences/Settings view |
| Shift + Ctrl + P | Open & closes the command palette |
| Ctrl + P or Ctrl + T | Open the Fuzzy Finder palette in which you can search and open files |
| Ctrl + B | Browse tabs within the window |
| Ctrl + Page Up | Cycle left through open tabs (in the active pane) |
| Ctrl + Page Down | Cycle right through open tabs (in the active page) |
| Ctrl + Shift + L | Select the language the file is in |
| Ctrl + Shift + M | Preview the file in the Markdown format |
| Ctrl + . | Show what keybindings the pressed key combination resolves to |
| Ctrl + K then Ctrl + B or Ctrl + \ | Toggle Atom's file Tree View |
| Alt + Ctrl + R | Reload the Editor |
| Ctrl + Alt + I | Open the Chrome Developer Tools/Console |
| Alt + Shift + S | Shows the snippets available to Atom |

Editing

| | |
|-------------------|--|
| Ctrl + Shift + D | Duplicate the line of the current cursor position and create a new line under it with the same contents |
| Ctrl + Shift + K | Delete the current line |
| Ctrl + Up arrow | Move the contents of the current cursor position up one line. If there is a line above with content, the current lines content will swap with the one above it |
| Ctrl + Down arrow | Move the contents of the current cursor position down one line. If there is a line below with content, the line's content will swap with the one below it |
| Ctrl + F | Open the Find/Replace panel |

F3

Toggle forward through the results of the current buffer in the file while the Find/Replace panel is active

| | |
|------------|--|
| Shift + F3 | Toggle backward through the results of the current buffer in the file while the Find/Replace panel is active |
|------------|--|

| | |
|------------------|--------------------------------|
| Ctrl + Shift + F | Open the Find in Project Panel |
|------------------|--------------------------------|

| | |
|----------|---------------------------|
| Ctrl + G | Open the Go To Line panel |
|----------|---------------------------|

| | |
|----------|--|
| Ctrl + M | The cursor goes to the matching top bracket that the cursor is encapsulated in |
|----------|--|

| | |
|----------|--|
| Ctrl + L | Select the entire line the cursor's current position is in |
|----------|--|

| | |
|----------|--|
| Ctrl + / | Toggle the selected text into a comment of the current grammar |
|----------|--|

| | |
|------------------------------------|---|
| Ctrl + Alt + Up arrow / Down arrow | Allows to select multiple rows, where the same edit will be applied |
|------------------------------------|---|

| | |
|----------|---|
| Ctrl + D | If you select a word, and then hit the key combo for this command, Atom will select the next same word for you. Then you can either type directly (which will replace the old words) or use left or right arrow to append things. |
|----------|---|

| | |
|----------|---|
| Ctrl + U | This undoes the previous selection, like from Select Same Words |
|----------|---|

| | |
|----------|--|
| Alt + F3 | This shortcut is similar to Cmd + D / Ctrl + D but it selects all the matching words at once |
|----------|--|

| | |
|----------|---|
| Ctrl + R | This shortcuts opens a palette that lists all the symbols (or functions) in your current file allowing you to fuzzy search and jump lines |
|----------|---|

| | |
|--------------|---------------------------------|
| Ctrl + Space | Show available auto-completions |
|--------------|---------------------------------|

| | |
|--------------------------------------|----------------------------------|
| Ctrl + Shift + [or Ctrl + Shift +] | Fold and Unfold sections of code |
|--------------------------------------|----------------------------------|

| | |
|------------------------------|---|
| Ctrl + K then Ctrl + [0 - 9] | Fold/Unfold at a specific indentation level where the number is the indentation depth |
|------------------------------|---|

Managing windows

| | |
|---------------------------------|--|
| Ctrl + N | Open an empty file in a new tab |
| Ctrl + Shift + N | Open a new editor window |
| Ctrl + O | Show the Open File dialog, which lets you select a file to open in the editor |
| Ctrl + Shift + O | Show the Open Folder dialog, which lets you select a folder to add to the editor's Tree View |
| Ctrl + S | Save the currently active file |
| Ctrl + Shift + S | Save the currently active file under a different name |
| Ctrl + W | Close active tab |
| Ctrl + Shift + W | Close active editor window |
| Ctrl + K then Arrow keys | Split the currently active tab in one of the four directions |
| Ctrl + K then Ctrl + Arrow keys | Move the focus to the pane in one of the four directions |
| F11 | Toggle full screen window |
