JS Bin cheat sheet

Application level

Ctrl + ?	Show keyboard shortcuts
Ctrl + Shift + /	Search help
Ctrl + L	Clear the console
Ctrl + Enter	Run code and send live reload
Ctrl + Shift + Del	Delete the current bin
Ctrl + S	Save current state as a revision
Ctrl + Shift + S	Create a clone of the current bin
unknown	Hide JS Bin navigation bar
Ctrl + O	Open bin history (when logged in)
Ctrl + Y	Toggle archive state on the current bin

Note that all changes in any code panel (excluding the console) both triggers a save to the current bin and triggers a live reload on any viewers watching your bin url.

Code based

Ctrl + /	Toggle comments on the selected lines
Ctrl + [	Indent selected lines
Ctrl +]	Unindent selected lines
Ctrl + Shift + L	Beautify code

HTML & CSS panel

Tab	Code expansion using Emmet
Ctrl + Alt + Right arrow	Next edit point
Ctrl + Shift + Y	Evaluate mathematical expression
Alt + Up arrow	Increment number by 0.1
Alt + Down arrow	Decrement number by 0.1
Ctrl + Up arrow	Increment number by 1
Ctrl + Down arrow	Decrement number by 1
Alt + Ctrl + Up arrow	Increment number by 10
Alt + Ctrl + Down arrow	Decrement number by 10

HTML panel

Ctrl + .	Close previous HTML tag

JavaScript panel

Tab	Code complete (using Tern or otherwise)

Console panel

Up arrow / Down arrow	Up/down through console history
Enter	Execute command

Showing and hiding panels

Ctrl + 0	Hide currently focused panel
Ctrl + 1	Toggle HTML panel
Ctrl + 2	Toggle CSS panel
Ctrl + 3	Toggle JavaScript panel
Ctrl + 4	Toggle console panel
Ctrl + 5	Toggle output panel

The shortcuts for toggling specific panels overwrites the default browser's tab selection shortcut, but this can be changed to include alt as a modifier key by opening the keyboard shortcuts (ctrl (plus) shift (plus) ?) and checking the box "Require Alt key…"

With Sublime keybindings

Ctrl + Shift + Up arrow	Move current line, up one line
Ctrl + Shift + Down arrow	Move current line, down one line
Ctrl + D	Highlight and place multiple cursor on matching words
Esc	Return to single cursor
Cmd + Left click	Place multiple cursor at click point
