

Kinesis Freestyle Edge RGB cheat sheet

General

Note: SmartSet key is the key with gear icon. It is used to control all onboard programming shortcuts.

SmartSet + Shift + L	Program lock/unlock. This will enable/disable all onboard programming commands to prevent accidental repogramming of the keyboard
----------------------	---

Remap	Remap key action. Enter Remap Mode, select the "Source" key action (LED flash rapid), then select the physical "Destination" key (LED flash slow)
-------	---

Macro	Record macro on-the-fly. Enter Macro Record Mode, select the "trigger" key or key combo (LED flash rapid), then type your macro (LED flash slow). Tap Macro again to stop recording
-------	---

Profile	Load profile (1 to 3)
---------	-----------------------

This will cycle between the three primary Profiles.
Profile 1 = Left LED, Profile 2= Right LED, and Profile 3 = Left & Right LED.

SmartSet + [1 - 9]	Load profile (1 to 9)
--------------------	-----------------------

When Profiles 4-9 are loaded, both of the LEDs will be off.

SmartSet + F7	Run status report
---------------	-------------------

SmartSet + F8	Connect/Disconnect v-Drive
---------------	----------------------------

SmartSet + F9 then [0 - 9]	Set Global Macro Playback Speed or Temporarily Disable Macros
----------------------------	---

SmartSet + F10	Enable/Disable NKRO mode
----------------	--------------------------

SmartSet + F11	Enable/Disable Game mode
----------------	--------------------------

SmartSet + Shift + F12	Soft reset. This will erase all custom remaps and macros in both layers of the active profile
------------------------	---

SmartSet + F12	(pressed when plugging the keyboard) Hard reset. Do this while plugging Edge into your computer to erase remaps and macros in all 9 profiles and restore the default keyboard settings
----------------	--

SmartSet + Profile	App refresh
--------------------	-------------

App Refresh shortcut implements all Layout, Lighting

and Settings changes saved via the SmartSet App without disconnecting the v-Drive.
