

# Live for Speed cheat sheet

## Car controls

Customizable:

Move the mouse	(move mouse left or right) Steer
C	Clutch
Q	Handbrake
W	Left View
E	Right View
L	Speed Limiter
3	Turn lights on / off

## In-Race car data

F9	Toggle Tyre Temperatures, Surface Loads Display and Clutch Temperature
Note: F9 is also the default key to turn on/off TrackIR. The result of this conflict is that it stops the key from working in LFS. Changing this key assignment in TrackIR software to something else not used by LFS (e.g. NumPad minus) will restore F9 functionality in LFS.	
F11	Toggle Live Settings display
F12	Toggle Pit Instructions (use arrow keys to change pit instructions)
Shift + L	Toggle Suspension View overlay

## Chat input

Ctrl + F1	... to F12: Customizable Messages
-	Toggle Block / Unblock All Chat Messages

## Connection list

SS: Send Setup

GREEN S: Save a Setup Sent to You

## Common

Right click	(on any slider) Directly enter a value
-------------	--

## Game

Shift + J	Join Race
Shift + P	Enter Garage (aka tele-pit)
Shift + S	Join Spectators
Shift + O	Options Screen

## Replay

2	Save Replay
---	-------------

## Controller / Sound

,	Less Force (extended keyboards)
---	---------------------------------

## In-game commands

/w COMMAND USERNAME - (eg. /w pb or /w pb johndoeracer)

/ws TRACK CAR COMMAND - (eg. /ws bl1 mrt laps)

/w txt MESSAGE - adds the text and sends it to the mobile phone
