

Live for Speed cheat sheet

Car controls

Customizable:

Left click	Throttle
Right click	Brake
Move the mouse	(move mouse left or right) Steer
S	Shift Up
X	Shift Down
C	Clutch
Q	Handbrake
W	Left View
E	Right View
R	Rear View
B	Horn
G	Flash Headlights
Space	Reset Car
L	Speed Limiter
O	Traction Control
I	Ignition

Non-customizable:

3	Turn lights on / off
7	Left indicator
8	Right indicator
9	Hazard lights
0	Indicators off

In-Race car data

F9	Toggle Tyre Temperatures, Surface Loads Display and Clutch Temperature
Note: F9 is also the default key to turn on/off TrackIR. The result of this conflict is that it stops the key from working in LFS. Changing this key assignment in TrackIR software to something else not used by LFS (e.g. NumPad minus) will restore F9 functionality in LFS.	
F10	Toggle Damage Display and Clutch Temperature
F11	Toggle Live Settings display
F12	Toggle Pit Instructions (use arrow keys to change pit instructions)

F	Toggle Forces view (force vectors on cars and tyres)
Shift + L	Toggle Suspension View overlay

Chat input

T	Open Chat Window
F1	... to F8 Customizable Messages
Ctrl + F1	... to F12: Customizable Messages
Alt + F1	... to F12: Customizable Messages
