

# Logitech POP Keys cheat sheet

## Setting up the Keyboard

Channel1	Enter pairing mode. The LED on the key will start blinking
----------	--

Open Bluetooth preferences on your PC or phone, and connect to the "Logi POP" from the list of devices.

Type the PIN code that appears on the screen.

## Multiple devices setup

Channel2	Press Channel 2 Easy-Switch Key for about 3 seconds. When the key LED starts blinking, you can pair a second device with the keyboard via Bluetooth
----------	---

To switch between devices, simply press Easy-Switch keys (Channel 1, 2 or 3).

## Switching OS layout

To switch to other operating system keyboard layouts, long press the following combinations for 3 seconds:

Fn + P	(press for 3 seconds) Switch to Windows / Android layout
Fn + O	(press for 3 seconds) Switch to macOS layout
Fn + I	(press for 3 seconds) Switch to iOS layout
