

Minecraft Java Edition cheat sheet

Non-configurable hotkeys

Wheel up and wheel down	Scroll through quick-bar and the chat when opened
Esc	Pause single player game
Esc	Exit the chat / command window
F1	Toggle heads up display (HUD)
Shift + Left click	Clicking item or stack will move it between inventory and stack
Shift + Left click	When a container is open, Shift + clicking on an item will move up to a stack between the container and the inventory
Shift + Left click	When a furnace is open, Shift + clicking an item or stack in the furnace moves it to the inventory
Shift + Left click	When crafting, Shift + clicking the crafted item automatically crafts the maximum number of that item for the materials being used (up to one stack), and moves all crafted items to the inventory
Shift + Left click	In the survival inventory tab of the creative inventory, Shift + clicking the X clears the whole inventory. In any other tab, Shift + clicking an item puts a stack into the hotbar

Debug screen

F3	Toggle showing extra debug information
Use shortcuts below when debug screen is open	
[1 - 9]	Display more detailed view of the graph on the right
Shift + F3	Display Profiler graph
F3 + T	Reload all textures, sounds and web-loaded client resources. This is useful for resource pack makers
F3 + P	Toggle the auto-pause when the window is out of focus
F3 + H	Toggle detailed item descriptions
F3 + B	Toggle showing hitbox around

entities

F3 + N	Cycle the player's game mode between Creative and Spectator
F3 + G	Show the chunk boundaries immediately surrounding the player

Configurable hotkeys

Left Control	Sprint
--------------	--------

Gameplay

Ctrl + Q	Drop whole stack of items. On Mac, use shortcut below, because this shortcut will quit game
----------	---
