

Minecraft Java Edition cheat sheet

Non-configurable hotkeys

Wheel up and wheel down	Scroll through quick-bar and the chat when opened
Esc	Open the menu and give back cursor control
Esc	Pause single player game
Esc	Exit the chat / command window
F1	Toggle heads up display (HUD)
F2	Use with F1 to take screenshots without HUD
Shift + Left click	Clicking item or stack will move it between inventory and stack
Shift + Left click	When a container is open, Shift + clicking on an item will move up to a stack between the container and the inventory
Shift + Left click	When a furnace is open, Shift + clicking an item or stack in the furnace moves it to the inventory
Shift + Left click	When crafting, Shift + clicking the crafted item automatically crafts the maximum number of that item for the materials being used (up to one stack), and moves all crafted items to the inventory
Shift + Left click	In the survival inventory tab of the creative inventory, Shift + clicking the X clears the whole inventory. In any other tab, Shift + clicking an item puts a stack into the hotbar
Shift + Up arrow / Down arrow	In the Multiplayer server selection menu, Shift + up and Shift + down moves a server name to a specific position. You can also hold shift while a server name is selected left click another server name and they will swap

Debug screen

F3	Toggle showing extra debug information
Use shortcuts below when debug screen is open	
[1 - 9]	Display more detailed view of the graph on the right
