Markdown styles

Add ** on both sides of a word or phrase to get bold text. For example, **bold**

Add * on both sides of a word or phrase to italicize. For example, *italicize*.

Add ` (single quotes) on both sides of a word or phrase to get the text in code.

Add ~~ on both sides of a word or phrase to get it crossed out. For example, ~~crossed out~~.

With the help of shortcuts below, you can also create various objects. They can only be used at the beginning of a line.

Type *, -, or + and press space to create a bullet list

Type [] (double brackets) to create checkboxes

Type 1. and a space to create a numbered list.

Type # and a space to create an H1 list

Type ## and space to create an H2 list

Type ### and a space to create an H3 list

Type " (regular quotes) and a space to create a quote

Type ``` (back quote) and a space to create a block of code
