

Firefox Developer Tools (Windows) cheat sheet

Opening and closing tools

These shortcuts work in the main browser window to open the specified tool. The same shortcuts will work to close tools hosted in the Toolbox, if the tool is active. For tools like the Browser Console that open in a new window, you have to close the window to close the tool.

Ctrl + Shift + I	Open Toolbox (with the most recent tool activated)
Ctrl + Shift + I or F12	Bring Toolbox to foreground (if the Toolbox is in a separate window and not in foreground)
Ctrl + Shift + I or F12	Close Toolbox (if the Toolbox is in a separate window and in foreground)
Ctrl + Shift + K	Open Web Console
Ctrl + Shift + C	Toggle "Pick an element from the page" (opens the Toolbox and/or focus the Inspector tab)
Shift + F7	Open Style Editor
Shift + F5	Open Profiler
Ctrl + Shift + E	Open Network Monitor
Ctrl + Shift + M	Toggle Responsive Design Mode
Ctrl + Shift + J	Open Browser Console
Ctrl + Alt + Shift + I	Open Browser Toolbox
Shift + F9	Storage Inspector
Ctrl + Shift + Z	Open Debugger

Toolbox

These shortcuts work whenever the toolbox is open, no matter which tool is active.

Ctrl +]	Cycle through tools left to right
Ctrl + [Cycle through tools right to left
F1	Toggle between active tool and settings.
Ctrl + Shift + D	Toggle toolbox between the last 2 docking modes
Esc	Toggle split console (except if console is the currently selected tool)

These shortcuts work in all tools that

are hosted in the toolbox:

Ctrl + +	Increase font size
Ctrl + -	Decrease font size
Ctrl + 0	Reset font size

Source editor

In the Editor Preferences section of the developer tools settings, you can choose to use Vim, Emacs, or Sublime Text key bindings instead.

To select these, visit `about:config`, select the setting `devtools.editor.keymap`, and assign "vim" or "emacs", or "sublime" to that setting. If you do this, the selected bindings will be used for all the developer tools that use the source editor. You need to reopen the editor for the change to take effect.

Ctrl + J then Ctrl + G	Go to line
Ctrl + F	Find in file
Ctrl + A	Select all
Ctrl + X	Cut
Ctrl + C	Copy
Ctrl + V	Paste
Ctrl + Z	Undo
Ctrl + Shift + Z or Ctrl + Y	Redo
Tab	Indent
Shift + Tab	Unindent
Alt + Up arrow	Move line(s) up
Alt + Down arrow	Move line(s) down
Ctrl + /	Comment/uncomment line(s)

Page Inspector

Ctrl + Shift + C	Inspect Element
------------------	-----------------

Node picker

Left click	Select the element under the mouse and cancel picker mode
Shift + Left click	Select the element under the mouse and stay in picker mode

HTML pane

These shortcuts work while you're in the Inspector's

HTML pane.

Del	Delete the selected node
Ctrl + Z	Undo delete of a node
Ctrl + Shift + Z or Ctrl + Y	Redo delete of a node
Down arrow	Move to next node (expanded nodes only)
Up arrow	Move to previous node
Home	Move to first node in the tree.
End	Move to last node in the tree.
Right arrow	Expand currently selected node
Left arrow	Collapse currently selected node
Enter	(When a node is selected) move inside the node so you can start stepping through attributes.
Tab	Step forward through the attributes of a node
Shift + Tab	Step backward through the attributes of a node
Enter	(When an attribute is selected) start editing the attribute
H	Hide/show the selected node
Ctrl + F	Focus on the search box in the HTML pane
F2	Edit as HTML
F2 or Ctrl + Enter	Stop editing HTML
Ctrl + C	Copy the selected node's outer HTML
S	Scroll the selected node into view
Enter	Find the next match in the markup, when searching is active
Shift + Enter	Find the previous match in the markup, when searching is active

Breadcrumbs bar

These shortcuts work when the breadcrumbs bar is focused.

Left arrow	Move to the previous element in the breadcrumbs bar
Right arrow	Move to the next element in the

breadcrumbs bar

Shift + Tab	Focus the HTML pane
Tab	Focus the CSS pane

CSS pane

These shortcuts work when you're in the Inspector's CSS panel

Ctrl + F	Focus on the search box in the CSS pane
Esc	Clear search box content (only when the search box is focused, and content has been entered)
Tab	Step forward through properties and values
Shift + Tab	Step backward through properties and values
Enter	or Space Start editing property or value (Rules view only, when a property or value is selected, but not already being edited)
