|                 |                                   |
|-----------------|-----------------------------------|
| S               | Save message                      |
| Shift + S       | Save as suggested                 |
| C               | Copy message                      |
| Shift + C       | Copy as suggested                 |
| G               | Go to folder                      |
| Shift + G       | Go as suggested                   |
| B               | Save message and go there         |
| L               | Hide folder pane                  |
| `               | Show messages with same sender    |
| ` then `        | Search messages with same subject |
| ` then ` then ` | Cancel QuickSearch                |

## 3-pane navigation

|                                 |  |
|---------------------------------|--|
| L                               | Hide/show the folder pane  |
| Esc then F                      | Focus the folder pane  |
| Esc then M                      | Focus the message pane   |
| Esc then Esc                    | Focus the thread pane  |
| Esc then Esc then Esc           | Focus the thread pane, clear quick search box, select the "All" view |
| Ctrl + Left arrow / Right arrow | Scroll the message from the thread pane                              |

## Rules

When a rule selects a folder for a given message, Nostalgia informs you in the status line. You can then use following shortcuts:

|           |                           |
|-----------|---------------------------|
| Shift + S | Move                      |
| Shift + C | Copy                      |
| Shift + G | Go to folder              |
| Shift + B | Save message and go there |

## In the composer

|                 |                        |
|-----------------|------------------------|
| T then O        | Change header to To:   |
| C then C        | Change header to Cc:   |
| B then C then C | Change header to Bcc:  |
| Esc then Esc    | Focus the message body |
