

MediaWiki cheat sheet

General

Modifier keys for MediaWiki shortcuts change depending on operating system and browser. For example on Chrome (Windows), we used Alt+Shift before pressing the shortcut key.

The Following table will help you find which modifier keys to use.

+	Start a new section on this page
N	Go to talk page for my IP address
.	Go to user page for my IP address
S	Block the IP address ("save")
V	Compare selected revisions
D	Delete this page
V	Show changes from current version (without saving/publishing)
E	Edit this page
S	Start exporting ("save")
H	View page history (list of changes to this page)
S	Start importing ("save")
O	Log in
Z or Z	Go to main page (home page for the wiki)
I	Toggle switch for marking the changes as minor
M	Move this page
Y	Go to my contributions (list of my edits to the wiki)
N	Go to my talk page
C	View the category page ("content", as opposed to "talk")
C	View the help page ("content", as opposed to "talk")
C	View the file page ("content", as opposed to "talk")
C	View the content page ("content", as opposed to "talk")
C	View the media page ("content", as opposed to "talk")
