-------	--

## Moving, rotation and resizing

Alt + Wheel up and wheel down	Zoom
Alt	(while resizing or moving) Ignore

grid snapping

Arrow keys	Move selected token one grid unit in the specified direction
Alt + Arrow keys	Move a selected token three pixel in the specified direction
E + Wheel up and wheel down	Rotate selected token by 45-degree or 30-degree increments, depending on your grid type
Alt + E + Wheel up and wheel down	Rotate selected token by 1 degree at a time
Right click + Move the mouse	Pan

## Miscellaneous

Z	(when an object is selected) Show a larger version of object in a modal popup
Shift + Z	GM shows all players larger version of object
Shift + Double click	Open Character Sheet that token represents (if exists)
Shift + Left click	While holding down Shift, hold down your Left Mouse Button upon a point on the tabletop. This will center everyone's field of vision about that point. This is known as "shift-pinging"
Alt	Holding down Alt while performing a multi-select (dragging a box around objects) will select ONLY objects classified as drawings
