

Snip & Sketch cheat sheet

Global

Win + Shift + S	Take a screenshot of selected area (works without starting Snip & Sketch too)
-----------------	---

Screenshots taken by this shortcut aren't automatically saved, they're only copied to clipboard.

To automatically save a screenshot, you can use Windows + PrintScreen shortcut. This will save the capture in your Pictures\Screenshots folder. This shortcut is probably not related to Snip & Sketch and capture entire screen (instead of letting you select the area).

General

Alt + M	Choose a snipping mode
Alt + N	Create a new snip in the same mode as the last one
Shift + Arrow keys	Move the cursor to select from different types of snips
