

# The Sims 4 cheat sheet

## General

Ctrl + Shift + Tab	Change camera type
V	Record video

## Camera controls in live and build mode

Home	Walls up
End	Walls down
Page Up	Go up a floor
Page Down	Go down a floor
Left click	(on Sim picture) Select Sim
Right click	(on Sim picture) Make Camera follow that Sim
Middle click + Move the mouse	Rotate view or tilt camera up/down to change angles
Z	Zoom in and out

## Live mode

Control + Shift + C	Access cheat console
---------------------	----------------------

## Buy and Build mode

When you remove objects in buy or build mode, you'll get some of your money back. Objects removed by placing a room on top of it or in any other way can be found in your Household Inventory.

Num +	After selecting an object but before placing it, pressing + on the num pad will cycle through color options for that item, allowing you to find what looks right for that room
Backspace	Press while holding an object to place it in the Household inventory. Good for storing multiple things fast
.	Rotate selected object right
Alt	While holding an object, this allows you to position it anywhere as opposed to on the Grid
F5	This will let you position objects relative to the grid, but at 1/2 to

	1/4 the usual distance. Good for precision
Control + F	While laying floor, do 1/4 of a tile at a time (little triangle) for artsy design
Del	Delete or sell selected object

## Bonus: Cheats

Cheats are not hotkeys, but we included them if you think Sims die too quickly or everything is too expensive.

Ctrl + Shift + C	Show the cheat console, so you can enter cheat texts below
Shift + ]	Increases the size of objects
Via (1), (2)
