

# Tiled (map editor) cheat sheet

## General

|                                |                                                                          |
|--------------------------------|--------------------------------------------------------------------------|
| Ctrl + N                       | Create a new map                                                         |
| Ctrl + O                       | Open any file or project                                                 |
| Ctrl + P                       | Open a file in the current project                                       |
| Ctrl + Shift + P               | Search for available actions                                             |
| Ctrl + Shift + T               | Reopen a recently closed file                                            |
| Ctrl + S                       | Save current document                                                    |
| Ctrl + Shift + S               | Save current document to another file                                    |
| Ctrl + E                       | Export current document                                                  |
| Ctrl + Shift + E               | Export current document to another file                                  |
| Ctrl + R                       | Reload current document                                                  |
| Ctrl + W                       | Close current document                                                   |
| Ctrl + Shift + W               | Close all documents                                                      |
| Ctrl + Q                       | Quit Tiled                                                               |
| Ctrl + Wheel up and wheel down | Zoom in/out on tileset and map                                           |
| Ctrl + + or Ctrl + -           | Zoom in/out on map                                                       |
| Ctrl + 0                       | Reset zoom on map                                                        |
| Ctrl + /                       | Adjust zoom to fit map in view                                           |
| Ctrl                           | (Object Move) Toggles "Snap to Grid" temporarily                         |
| Ctrl                           | (Object Resize) Keep aspect ratio                                        |
| Alt                            | (Object Resize) Toggles "Snap to Grid" temporarily                       |
| Middle click or Space          | Hold to pan the map view                                                 |
| Ctrl + X                       | Cut (tiles, objects or properties)                                       |
| Ctrl + C                       | Copy (tiles, objects or properties)                                      |
| Ctrl + V                       | Paste (tiles, objects or properties)                                     |
| Del                            | Delete (tiles, objects, properties or layers)                            |
| Ctrl + G                       | Toggle displaying of the tile grid                                       |
| H                              | Toggle highlighting of the current layer                                 |
| Ctrl + M                       | Invokes Automapping                                                      |
| Alt + C                        | Copy current position of mouse cursor to clipboard (in tile coordinates) |

|                                         |                                                                                                          |
|-----------------------------------------|----------------------------------------------------------------------------------------------------------|
| Ctrl + D                                | Duplicate selected objects                                                                               |
| Ctrl + J                                | Create a new layer and copy the currently selected objects or tiles to it                                |
| Ctrl + Shift + J                        | Create a new layer and move currently selected objects or tiles to it                                    |
| Ctrl + Shift + D                        | Duplicate selected layers                                                                                |
| F2                                      | Rename (if applicable in context)                                                                        |
| Tab                                     | Hide docks and tool bars                                                                                 |
| Ctrl + Page Up                          | Select previous layer (above current layer)                                                              |
| Ctrl + Page Down                        | Select next layer (below current layer)                                                                  |
| Ctrl + Shift + Up arrow                 | Move selected layers up                                                                                  |
| Ctrl + Shift + Down arrow               | Move selected layers down                                                                                |
| Ctrl + H                                | Show/Hide selected layers                                                                                |
| Ctrl + L                                | Lock/Unlock selected layers                                                                              |
| Ctrl + Shift + H                        | Show/Hide all other layers (only active layer visible / all layers visible)                              |
| Ctrl + Shift + L                        | Lock/Unlock all other layers                                                                             |
| Ctrl + Tab or Alt + Left arrow          | Switch to left document                                                                                  |
| Ctrl + Shift + Tab or Alt + Right arrow | Switch to right document                                                                                 |
| ]                                       | Select next tileset                                                                                      |
| [                                       | Select previous tileset                                                                                  |
| Ctrl + T                                | Force-reload all tilesets used by the current map (mainly useful when not using the automatic reloading) |
| Ctrl + Shift + A                        | Clear any object and tile selection                                                                      |

## When a tile layer is selected

|                    |                                                                             |
|--------------------|-----------------------------------------------------------------------------|
| Right click        | (on tile) Captures the tile under the mouse (drag to capture larger areas). |
| Ctrl + Right click | Selects the layer containing the top-most tile under the mouse.             |

|                            |                                                                                                                                     |
|----------------------------|-------------------------------------------------------------------------------------------------------------------------------------|
| D                          | Toggle Random Mode                                                                                                                  |
| B                          | Activate Stamp Brush                                                                                                                |
| Shift + Left click         | Line mode, places tiles on a line between two clicked locations                                                                     |
| Ctrl + Shift + Left click  | Circle mode, places tiles around the clicked center                                                                                 |
| T                          | Activate Terrain Brush                                                                                                              |
| F                          | Activate Bucket Fill Tool                                                                                                           |
| P                          | Activate Shape Fill Tool                                                                                                            |
| E                          | Activate Eraser                                                                                                                     |
| R                          | Activate Rectangular Select                                                                                                         |
| W                          | Activate Magic Wand                                                                                                                 |
| S                          | Activate Select Same Tile                                                                                                           |
| Ctrl + [1 - 9]             | Store current tile stamp. When no tile drawing tool is selected, tries to capture the current tile selection (similar to Ctrl + C). |
| C                          | Recall a previously stored tile stamp (similar to Ctrl + V)                                                                         |
| Ctrl + A                   | Select the whole layer                                                                                                              |
| Changing the active stamp: |                                                                                                                                     |
| X                          | Flip active stamp horizontally                                                                                                      |
| Y                          | Flip active stamp vertically                                                                                                        |
| Z                          | Rotate active stamp clockwise                                                                                                       |
| Shift + Z                  | Rotate active stamp counterclockwise                                                                                                |

## When an object layer is selected

|           |                                                                    |
|-----------|--------------------------------------------------------------------|
| S         | Activate Select Objects                                            |
| Page Up   | Raise selected objects (with Manual object drawing order)          |
| Page Down | Lower selected objects (with Manual object drawing order)          |
| Home      | Move selected objects to Top (with Manual object drawing order)    |
| End       | Move selected objects to Bottom (with Manual object drawing order) |
| O         | Activate Edit Polygons                                             |
| R         | Activate Insert Rectangle                                          |
| I         | Activate Insert Point                                              |

|          |                                            |
|----------|--------------------------------------------|
| C        | Activate Insert Ellipse                    |
| P        | Activate Insert Polygon                    |
| Enter    | Finish creating object                     |
| Esc      | Cancel creating object                     |
| T        | Activate Insert Tile                       |
| V        | Activate Insert Template (since Tiled 1.1) |
| E        | Activate Insert Text                       |
| Ctrl + A | Select all objects on the selected layers  |

## Properties dialog

|           |                   |
|-----------|-------------------|
| Backspace | Delete a property |
|-----------|-------------------|
