## Defining selections

Num + or Ctrl + W	Selection increase
Num - or Ctrl + Shift + W	Selection decrease
Alt + Shift + Left arrow	Select CamelCase left
Alt + Shift + Right arrow	Select CamelCase right
Caps Lock + Shift + Arrow keys	SmartNav select
Ctrl + Alt + Enter	Multi-select

## Wrapping selections

Note: This needs to be enabled in the CodeRush Setup Wizard on the One-key Selection embedding page.

/	Comment/Uncomment
'	(VB) Comment/Uncomment
B or Shift + [	Block begin/end
C	Try/Catch
F	Try/Finally
T	Try/Catch/Finally
Shift + 0 or Shift + 9	Parens
Shift + 1	Not parens

## Extended shortcuts

Enable on the Numeric Keypad Bindings page in the CodeRush Setup Wizard to get new extended shortcuts to help you refactor, select, and navigate through your code.

Num 0	Refactor
Num .	Jump to... (menu)
Num -	Selection decrease
Num +	Selection increase
Num Enter	Jump to symbol

## Code generation & Refactoring

Note: Enable Caps shortcut in the Setup Wizard on the Caps as a Modifier page.

Num 0 or Ctrl + .	Refactor/Declare
Space or Tab	Expand template
Alt + Up arrow	Cycle scope up
Alt + Down arrow	Cycle scope down
Shift + Enter	Duplicate line/selection
Caps Lock + C	Declare class
Caps Lock + M	Declare method
Caps Lock + P	Declare property
Caps Lock + F	Declare field
Caps Lock + L	Declare local
Caps Lock + Q	Declare constant
Caps Lock + /	Args up/down

Caps Lock + Del	Delete unused
Caps Lock + Insert	Add code
Caps Lock + Space	Toggle code

## Debugging

Alt + F9	Toggle temporary breakpoint
Ctrl + Shift + F11	Step into member
Alt + Down arrow	Show expression explorer
Ctrl + Alt + D	Toggle debug visualizer
Ctrl + R	Refresh/Evaluate expression

## Test runner

Ctrl + T then R	Run active test
Ctrl + T then D	Debug active test
Ctrl + T then F	Run all tests in File
Ctrl + T then S	Run all tests in Solution
Ctrl + T then L	Repeat last test run
Ctrl + T then T	Show unit test runner

## Templates

Press Space or Tab and type these declaration characters.

System:

'	b - Boolean
'	by - Byte
'	c - Char
'	d8 - DateTime
'	de - Decimal
'	d - Double
'	ea - EventArgs
'	x - Exception
'	g - Guid
'	sh - Int6
'	i - Int32
'	l - Int64
'	ip - IntPtr
'	o - Object
'	si - Single

' s - String

' ts - TimeSpan

' ty - Type

' u - UInt32
