

Measure

1	Initiates Point measurement
2	Initiates Line measurement
3	Initiates Circle measurement
4	Initiates Line measurement
5	Initiates Sphere measurement
6	Initiates Cylinder measurement
7	Initiates Cone measurement
8	Initiates Slot measurement
9	Initiates Ellipse measurement
0	Initiates Inspect/Build mode
A	Toggles Build Arrow display On/Off while Inspect/Build
В	Toggles On/Off to display measured points as spheres
С	Center the Graphics window on the current probe location
D	Terminate the measurement of the current feature
G	Toggle color bar gage
К	Use during Auto Alignment and Auto Inspect
L	Toggles Laser Beam display, from the origin of the active device to the measure Points
Μ	Opens Preferences – Projection Settings
Ν	Toggles Point names On/Off
Ρ	Toggle between Single/Stationary Point and Continuous Pointcloud
R	Toggles Device Manager display on/off
S	Toggle to hide or unhide Measure Settings dialog
U	Undo the last probe-hit or when measuring features, undo the feature. Works when using Measure and Auto Align
V	Toggles Feature and Point vectors on/off and small, mid, or large
+	Increment the Point number

-	Decrease the Point number
Esc	Finish or Abort current Feature measurement
Space	Trigger measurements

Operations managers

В	Toggles on/off to display measured points as spheres
D	Toggle Feature body display
G	Global Register
L	Toggles Laser Beam display, from the origin of the active device to the measure Points
N	Toggles point names on/off
R	Toggles Device Manager on/off
S	Show feature measured points
V	Toggles Feature and Point vectors On/Off
Z	Toggles the Vector of the Point or Feature; off, small, medium, or large

Device

First	Record a probe-hit
Second	Terminate measurement of the current feature
Second	(hold) Undo the last probe-hit or, when measuring features, undo the feature
F8	For Laser Trackers only
